

# WARREN COUNTY FLOOD PERMIT APPLICATION

---

Application is hereby made for a Flood Permit as required by the Special Purpose Flood Damage Reduction Regulations No. 10-1527 of Warren County for development in an identified flood hazard area. All activities shall be completed in accordance with the requirements of said regulations. The development to be performed is described below and in attachments hereto. The applicant understands and agrees that:

- The permit applied for, if granted, is issued on the representations made herein;
- Any permit issued may be revoked because of any breach of representation;
- Once a permit is revoked all work shall cease until the permit is reissued or a new permit is issued;
- Any permit issued on this application will not grant any right or privilege to erect any structure or sue any premises described for any purposes or in any manner prohibited by the ordinances, codes, or regulations of the municipality;
- The applicant hereby gives consent to the Floodplain Administrator to enter and inspect activity covered under the provisions of the floodplain regulations;
- If issued, the FHA Development Permit form will be posted in a conspicuous place on the premises in plain view; and
- If issued, the permit will expire if no work is commenced within one year of issuance.

## APPLICANT/OWNER INFORMATION:

Applicant Name: _____	Owner Name: _____
Address: _____	Address: _____
City/Zip: _____	City/Zip: _____
Phone: _____	Phone: _____
Email: _____	Email: _____

## SITE INFORMATION:

Parcel #: _____	Address: _____
Municipality: _____	City/Zip: _____

Kind of development proposed (check all that apply):

### Residential structure

- New structure
- Addition to structure
- Renovations/repairs/maintenance
- Manufactured home installation

### Non-residential structure:

- New structure
- Addition to structure
- Renovations/repairs/maintenance

# WARREN COUNTY FLOOD PERMIT APPLICATION

---

Accessory structure                      Dimensions: \_\_\_\_\_

Filling or grading                      Dredging or excavation or mining

Materials/equipment/storage: Describe type: \_\_\_\_\_

Watercourse alteration (any change that occurs within the banks of a watercourse)

Water supply/sewage disposal                      Bridge or culvert placement/replacement

Subdivision greater than 50  
lots or 5 acres                      Other development greater than 5 acres

Other: \_\_\_\_\_

Additional activity description: \_\_\_\_\_

Cost of proposed construction (if addition, renovation, repair, or maintenance to an existing structure): \_\_\_\_\_ Estimated market value of existing structure: \_\_\_\_\_

## NOTES AND ADDITIONAL SUBMITTAL REQUIREMENTS:

---

In addition to completion of this form the applicant agrees to submit any additional information required by the floodplain administrator in order to determine that the proposed development is compliant with the local and federal flood damage prevention criteria of the National Flood Insurance Program. Site plans for all development proposals must:

- Be drawn to scale with north arrow.
- Show property boundaries, floodway, and floodplain lines.
- Show dimensions of the lot.
- Show dimensions and location of existing and/or proposed development on the site.
- Show areas to be cut and filled.

Applications for residential and non-residential structures must also include:

- The proposed lowest floor elevation based on the datum used on the effective Flood Insurance Rate Map and base flood elevation for the site.
- Identification of whether the structure has a basement or enclosure below the lowest floor, and if it contains a basement or enclosure, detailed drawings showing foundation openings to allow passage of floodwaters.

## WARREN COUNTY FLOOD PERMIT APPLICATION

---

- Description of how building utilities will be protected from flood waters including drawings showing locations of such utilities.
- Detailed description of anchoring system for all mobile and manufactured homes.
- Description of construction materials that will be used below the flood protection elevation.

An existing structure must comply with the flood protection standards if it is substantially improved (an improvement equal to or greater than 50% of the market value of the structure). The "substantial improvement" definition applies to existing structures only and that once a structure meets the definition of "new construction" any further improvements to that structure must meet "new construction" requirements. For floodplain management purposes "new construction" means structures for which "start of construction" began on or after the effective date of the initial Flood Insurance Rate Map issued by FEMA for the community.

Any Pre-FIRM structure within the SFHA that has sustained damage from any source (flood, fire, etc.) must be evaluated to determine if the structure is "substantially damaged" (damaged to 50% or more of the market value of the structure). If the structure is "substantially damaged, the structure must be brought into compliance with the flood protection standards.

For subdivision proposals greater than 5 acres or 50 lots, or large-scale developments greater than 5 acres, a hydrologic and hydraulic analysis must be conducted to determine base flood elevations in flood hazard areas where no base flood elevations are provided.

A Conditional Letter of Map Revision (CLOMR) must be obtained for proposed projects that would result in more than a 1.0 foot increase in BFE on a watercourse that has been studied through detailed hydrologic and hydraulic analyses where BFEs have been specified, but no floodway has been designated OR when a project proposed (totally or partially within the floodway) along a watercourse for which detailed analyses have been conducted and BFEs and a floodway have been designated would result in any (greater than 0.0 foot) increase in the BFE.

Applications for non-residential structures proposed to be floodproofed must have a completed FEMA floodproofing certification form attached (can only be completed by a Registered Professional Engineer or Architect).

All development proposals determined to be located in a floodway must be accompanied by a hydrologic and hydraulic analysis showing impacts on of the development on flood heights (can only be completed by a Registered Professional Engineer).

Development proposals that are considered alterations of a watercourse must be accompanied by an analysis showing that the flood carrying capacity of the watercourse has not been reduced.

I AGREE THAT ALL STATEMENTS IN AND ATTACHMENTS TO THIS APPLICATION ARE A TRUE DESCRIPTION OF THE EXISTING PROPERTY AND THE PROPOSED DEVELOPMENT ACTIVITY. I UNDERSTAND THE DEVELOPMENT REQUIREMENTS FOR SPECIAL FLOOD HAZARD AREA ACTIVITIES PER THE APPROPRIATE ORDINANCE OR RESOLUTION AND AGREE TO ABIDE THERETO. I UNDERSTAND IT IS MY RESPONSIBILITY TO OBTAIN ALL OTHER APPLICABLE FEDERAL, STATE AND LOCAL PERMITS.
